Having British Passport, I am eligible to take up any employment without sponsorship from the Company. **Open to Relocate based on requirement: Yes, anywhere.**

PROFESSIONAL PROFILE

Enterprise Data, AI, and Technology leader with multi years of global experience driving large-scale digital transformation across Banking, Insurance, and Financial Services. Proven track record in shaping corporate data strategy, modernizing enterprise architectures, and leading AI, ML, and cloud platforms that power mission-critical decision-making.

Currently leading Product Development for Risk & Exposure Modelling at AXA Group (Reinsurance), delivering next-generation data platforms, AI-driven underwriting intelligence, and cloud-first architectures. Adept at aligning business strategy with data governance, regulatory compliance, and advanced analytics to unlock enterprise value.

Recognized for building high-performing multicultural teams, influencing senior stakeholders, and steering complex portfolios across the full SDLC. Deep expertise in AI, Deep Learning, Cloud, Data Engineering, and emerging technologies including Blockchain and GenAI.

BUSINESS & FINANCE SKILLS:

- **Leadership**
- **Stakeholder Management**
- **Risk Management**
- **Risk Modelling**
- **Requirement gathering**
- **Negotiation and Bargaining**
- **Audit & Compliance**
- **IT Security**
- **Operations management**
- **Data Modelling**
- **Product Management**
- **Corporate Governance**

IT & LEADERSHIP SKILLS:

- **Database SQL 2016, 2019, 2022**
- **Microsoft (Azure, Excel, Power point, Visio, Access)**
- **Cloud (Azure)**
- **Machine Learning (Supervised and Un-supervised)**
- **Performance Management (Query optimization, server upgrade)**
- **Language (Angular 17, Python, ASP.NET, HTML 5, CSS, JavaScript, XML, XSLT, XSD/ Visual C#, VB 6)**
- **Future Technology (AI, ML, RPA, Agentic AI and Blockchain)**
- **Collaborations (JIRA, Confluence, ServiceNow, SharePoint)**
-
- **BI Tools: Power BI, SSRS, SSIS, SSAS**

Data & AI Leadership

- **Enterprise Data Strategy & Governance**
- **AI/ML Platform Ownership**

- **Data Quality, Master Data, Metadata & Lineage**
- **Risk Modelling & Predictive Analytics**
- **Responsible AI & Model Governance**

Technology & Architecture

- **Cloud Architecture (Azure IaaS/PaaS/SaaS)**
- **Data Engineering (ADF, Databricks, ETL Pipelines)**
- **Enterprise Architecture (API, Microservices, 3-Tier)**
- **Performance Engineering & Optimization**
- **BI & Analytics (Power BI, SSRS, SSIS, SSAS)**
- **ITIL certified, Microsoft Certified, many other certifications in leadership and Technology.**
- **Completed Leadership training from London Business School.**

Executive & Business Leadership

- **C-Suite Stakeholder Management**
- **Corporate Governance & Audit Compliance**
- **Product Strategy & Road Mapping**
- **Budget Ownership & Financial Planning**
- **Vendor, Contract & Negotiation Leadership**
- **Regulatory Engagement (Global Regulators)**

CAREER EXPERIENCE

AXAXL, London, UK **2022 to Present**

***Reinsurance Applications Cloud Migration*,**

Technologies – Microsoft Azure .NET C#, Web Services, SQL Server 20119, SharePoint 2010, WCF, Angular, Qlik Sense. Total Team Size - 100

Managed end to end solution for Azure Migration of number of applications like EMT, CLR, ReDoc, ApDoc, ReCAP and RDU. App modernisation, App migration, DB migration, SSIS ETL packages-dataflow and control flow migration on azure Cloud environment using Azure ADF, creating Dataset, Dataflow, pipelines and scheduling of pipelines etc.

AI, Data & Technology Delivery

- Directed development of AI-driven risk scoring, predictive exposure models, and automated underwriting workflows.
- Architected large-scale data frameworks covering ingestion, modelling, lineage, governance, and real-time analytics.
- Implemented ADF, Databricks, and advanced ETL pipelines to modernize data processing and reduce latency.

Leadership & Governance

- Product Owner for a global, distributed team; built a culture of innovation, accountability, and continuous delivery.
- Managed multi-million-pound budgets, vendor contracts, and technology negotiations.
- Ensured compliance with international regulatory standards, audit frameworks, and cyber-security requirements.

Key Achievements

- Delivered a next-generation reinsurance modelling platform used across Property, Casualty, Marine, and Aviation portfolios.

- Designed enterprise architecture components enabling rapid development, secure data access, and consistent governance.
- Drove digital transformation initiatives that significantly improved operational efficiency and decision accuracy.

AXAXL, London, UK **2011 to 2022**

Reinsurance Underwriting and Exposure Management System,

Technologies – Microsoft Azure, .NET C#, Web Services, SQL Server 2016, SharePoint 2010, WCF, Angular, Qlik Sense. Total Team Size - 100

Automation of underwriting processes for Casualty, Property, Marine and Aviation Re-Insurance business. Also automating the exposure calculation and RDS management systems.

Key Responsibilities –

- Strong business partnering in order to solve complex business challenges.
- Work closely with the business team for strategy and product vision.
- Cloud migration of web components and database to Microsoft Azure.
- Motivate the distributed & diverse team as Product Owner.
- Managed the product development in Agile/Scrum methodology.
- Results-oriented and focused on improvements.
- Manage strong stakeholder relationships at all levels.
- Budget management for the program delivery.
- Coached and mentored high-performing teams to build leaders of the future.

The key challenge in this project was to design the core architecture components, working with a team of architects to make the framework ready for the new suite of development, and at the same time ensuring the timely delivery. The architecture framework includes UI design & coding and remote database calls, error handling, customised user interface components, deployment, auditing strategy, quick reports etc.

Capita Children Services **May 2006 – April 2011**

Management Information System (Capita Children Services, UK) May 2006 – April 2011

Technologies - .NET 4.0, C#, Web Services, SQL Server 2008, WCF, ASP.NET

Total Team Size - 80

Capita Children Services is the UK's leading supplier of IT systems, providing a range of software and IT services to 22000 Schools and 150 Local Authorities within UK. MIS system is a complete enterprise level application automating Service Desk, Finance and Professional Services.

Key Responsibilities –

- Design and deliver IT strategy and organizational structure aligned to business objectives.
- A highly skilled leader, bringing a disciplined approach which augments delivery.
- Automates internal systems and processes to improve efficiency and productivity.
- Ensures adoption of new systems and processes by aligning this with performance goals.
- Drives Cloud and Agile adoption to futureproof application delivery.
- Implements technical change including machine learning, natural language processing and digital customer experience.
- Worked closely with the team of architects, for the designing and developing.
- Design and development of workflow for Finance and Professional Services.
- Managed distributed teams for work scheduling and work completion.
- Managed product roadmap and enhancements based on customer data needs.

PIE (Payments Information Engine) ***(Unisys Ltd, UK)*** **July *2002 to April 2006***

Technologies - .NET 1.1, C#, SQL Server 2000, XML, XSLT, MS Visio for designing.

Total Team Size - 30

PIE (Payment Information Engine) aims at automating the Cheque Clearing Process. This is a huge multimillion-pound project that covers 80% of UK check clearing process with major banks like **Barclays, HBOS, and Lloyds TSB**.

Key Responsibilities –

- Actively involved in the estimation and design of the modules
- Working as a senior .NET developer I was responsible for database design and entity modelling.
- Mentoring the team members and providing technical assistance to them for any technical difficulties.
- Vendor team management.

EDUCATION

- **Leadership Program, London Business School, UK**
- **Bachelor of Engineering (Electronics & Communication).**
- **Microsoft Certified Solution Developer (MCSD .NET)**
- **Strong in Azure DevOps, Performance Management**
- **DevOps Foundation LinkedIn- PMI**
- **Agile Certified LinkedIn PMI**

OTHER

- **Nationality:** **British**.
- **Availability for Interview:** **1-week notice required.**
- **Notice Period:** **8 Weeks.**
- **Reference:** **Will be provided, if required.**
